Aviation and Livestock Station
of the remount depot at the rate of
about a trainload a day. A total of
5550 have been forwarded each to
points in the East and Southwest for
National Guard troops and ship-
ments from the remount depot at El
Paso to the Western Department
have likewise been commenced.
When existing orders have been
filled the government will still have
about 27,000 head of horses and
mules here and at El Paso available
for distribution.

Many Seeking Commissions
Applications for commissions as
reserve officers are flowing into the
Reserve corps office by the hun-
dreds. Many San Antonians are
seeking commissions and this big-
list is being constantly augmented by
applicants from outside points and
enlisted men in the army. So heavy
has become the rush of business that
it is probable the special board for
examination of applicants which has
been meeting twice a week will have
to hold extra sessions. Major Ster-
ing Price Adams and Capt. John V.
Spring Jr. have been detailed to as-
sist Lieut. Col. Lawrence J. Fleming,
oner in charge of the Reserve
corps activity.

Now that the United States is ac-
ually at war with Germany it is
likely that applicants will be called
into service as fast as they are ac-
cepted. A number of San Antonians
have already applied, before the
board and recommendations have
