Copy, Color, Cut and Iron Flannel Board Pieces

- Materials Needed:
  - Pellon® 808 Craft-Fuse® (You can buy this material by the yard at a fabric store.)
  - Iron and iron-safe surface
  - Wax paper
  - Permanent marker
  - Colored pencils or crayons
  - Scissors
  - Felt
  - A copy of the images you’ll trace

1. Take a look at the Pellon®. You’ll see that there is a shiny backside and duller topside. The plain fabric side is where you will copy and color your image.

2. Put down a piece of wax paper to protect your table. Using the permanent marker, trace the image onto the plain side (not the shiny side) of the Pellon®.
3. Use colored pencils and/or crayons to color your image.

4. Cut out the image, with or without a border is fine.

5. Ironing comes next. Shiny side down.

5. Put a large piece of felt (shown in black) on your ironing board. Put the image on the felt, making sure that there is a border of felt all the way around the image. Put down a piece of wax paper over the image and felt so that the crayon doesn’t melt onto your hot iron. Iron the image to the felt with a hot, dry, iron. Remove the wax paper and check to make sure that the image is securely affixed to the felt. If it is loose at all, go over it again with the iron. Finally, cut out your image. It’s ready to use with your flannel board.
